Hospital
Recognition
for Pediatric
Medical
Emergencies

Goal for this measure is that by 2022:

25% of hospitals are recognized as part of a statewide standardized program and able to stabilize and/or manage pediatric medical emergencies.

Benchmarks:

2019 – 5%

2020 – 15%

2021 – 20%

Hospital Recognition for Pediatric Medical Emergencies

You will also be asked to enter the following:

Using a scale of 0–5, please rate the degree to which your state or territory has made toward establishing a recognition program for pediatric medical emergencies.

- 0** = No progress has been made towards developing a statewide, territorial, or regional program that recognizes hospitals that are able to stabilize and/or manage pediatric medical emergencies.
- 1** = Research has been conducted on the effectiveness of a pediatric medical facility recognition program (for improved pediatric outcomes), and/or developing a pediatric medical facility recognition program has been discussed by the EMSC Advisory Committee and members are working on the issue.
- 2** = Criteria that facilities must meet in order to receive recognition as being able to stabilize and/or manage pediatric medical emergencies have been developed.
- 3** = An implementation process or plan for the pediatric medical facility recognition program has been developed.
- 4** = The implementation process or plan for the pediatric medical facility recognition program has been piloted.
- 5** = At least one facility has been formally recognized through the pediatric medical facility recognition program.

Emergency Medicine Committee, EMERGENCY NURSES ASSOCIATION Pediatric Committee

This is a revision of the previous joint Policy Statement titled “Guidelines for Care of Children in the Emergency Department.” Children have unique physical and psychosocial needs that are heightened in the setting of serious or life-threatening emergencies. The majority of children who are ill and injured are brought to community hospital emergency departments (EDs) by virtue of proximity. It is therefore imperative that all EDs have the appropriate resources (medications, equipment, policies, and education)
